Subject: RE: Interference search

The application number is 08/035,366. The only patent issued from the family is 5,362,623. The claims are to a different invention though.

Also, what was the application number, has there been any publication(s) of related applications in the family that I could use as art?

Joe

Subject: Interference search

I'm ready to allow a case just released from interference.

Inventor: Vogelstein

EFD: 3/29/89

Claim:

A method of supplying wild-type p53 gene function to a cell which has lost said gene function by virtue of mutation in a p53 gene, comprising introducing a wild-type p53 gene into a cell which has lost said gene function such that said gene is expressed in the cell.

Any interference?

***Thanks,
Peter***
